

# Printing Solutions

[www.adpsi.com](http://www.adpsi.com)

ADP Services provides a range of cost effective, printing and document management solutions, competitive hardware and consumables supply, electronic forms, specialist bulk printing and mailing services and machine sealed secure payslip production.

## ■ Print solutions offered by ADP Services

### **ADP Print Plan**

ADP Print Plan is a new service that provides printers, installation, support, maintenance and all consumables on a rental basis. With costs directly linked to the number of pages printed, the savings available are significant.

By offering the latest Lexmark printers without the capital outlay, coupled with an end-to-end service from ADP, all printing and associated costs have been fully integrated. ADP Print Plan is a simple, cost effective solution, allowing businesses to pay for what they print with a single, easily budgeted payment.

### **ADP Consumables - savings!**

ADP stock a wide range of consumables for all business needs. Through a new direct relationship with Lexmark, ADP can offer customers Lexmark laser printers, toner cartridges and maintenance kits at highly competitive prices.

In addition, ADP also supply 'off the shelf' pre-printed forms and personalised bespoke forms designed and printed to a customer's own corporate identity and specification.

## ■ More print solutions offered by ADP Services

### ADP Print

ADP Print (formerly KPrint) is a document output management system which produces high quality laser documents on plain paper by integrating electronic forms with ADP Autoline applications. The key benefits with ADP Print is that it allows you to have a flexible and efficient printing solution without the need for pre-printed stationery.

### ADP Fax and SMS

ADP Fax and ADP SMS are add-on modules to the ADP Print application which supports outbound fax and SMS messages. Multi channel modems are supported for high volume faxing, dependant on the revision modules within Autoline.

### ADP Rewind

ADP Rewind is a tool which interacts with ADP Print to automatically backup all printed files and electronically store them on the ADP Print server for a defined period. In the event of a DMS failure or corruption any historic documents can be reprinted easily.

### ADP Scan

An alternative to mass archiving of paper, ADP Scan enables documents to be scanned, such as job cards and delivery notes, to a central server, which can then be viewed via a search facility on a secure website.

### ADP Cheques

Generated by Autoline and printed via ADP Print, ADP Cheques are fully compliant with the latest APACS requirements. ADP Cheques can be fully personalised with customers own corporate identity. Cut sheet cheques are simply loaded onto the printer, which then prints the payee and the amounts details onto the pre-printed base stock in one smooth process.

### ADP Payslips

ADP hand seal Payslips are generated from Autoline, printed via the ADP Print application and uses ADP's hand seal laser compatible forms. Whilst the payslip is being printed, the laser printer warms the pre applied glue on the form, which enables the individual sheets be folded and sealed securely by finger pressure.

### ADP Pressure Seal

The ADP pressure seal solution offers the ultimate in document security. It is ideal for processing one piece mailers such as payslips, statements and remittance advice notes. The pressure seal machine, used in conjunction with ADP's laser compatible forms, will efficiently fold and seal forms in one easy motion. It can also be used as a 'paper folder' capable of folding 2,000 sheets per hour.

### ADP Mailing Solutions

ADP offers a document outsourcing service that provides laser printing and fulfilment. Used in conjunction with ADP Print, ADP can directly access a customer's system and securely print/mail documents, whether the mailing is single or multi page.

### ADP Signature Fonts

ADP Signature Fonts enable the reproduction of hand written signatures as a font. This can then be used, not only within ADP Print related documents such as credit chase letters, but also for non-ADP applications such as Microsoft Word.
